

### Annual Water Quality Reports Available for Maine Water Customers

**Saco, Maine — May 24, 2021** Maine Water's latest water quality reports summarizing the results of the water quality tests conducted on Maine Water's 18 water systems in 2020 are now available on the company's website at [MaineWater.com/Water-Quality](http://MaineWater.com/Water-Quality).

In addition to water quality test results, the reports provide information on the company's water sources, source protection measures and Maine Water Drinking Program (DWP) and Environmental Protection Agency (EPA) state and federal standards for drinking water.

"Maine Water employees are committed to delivering safe, high-quality drinking water to our customers and communities. We know that water is one of life's essentials and touches everything we care about," said Mark Vannoy, Vice President of Maine Water. "We encourage our customers to read their system's water quality report to see the extensive water quality monitoring and testing performed throughout the year to ensure that they can have confidence in the quality of the water delivered to their taps 24 hours a day, 365 days a year."

On average, Maine Water performs 110,000 water quality tests annually, testing on over 120 parameters that could affect the quality of drinking water. The company collects water samples at the source prior to treatment, during the treatment process, and in the distribution system. Samples are tested at state certified laboratories and submitted to Maine's Drinking Water Program.

Maine Water has also completed testing of each of its water sources for PFAS (per- and polyfluoroalkyl substances). Maine Water is in full compliance with current DWP and EPA health advisories for PFAS in drinking water. Further, Maine Water would also be in compliance if an interim limit for PFAS of 20 ppt (parts per trillion) that is currently pending before the Maine legislature is adopted.

###

#### About Maine Water

The Maine Water Company is a public water utility that owns 12 public water systems engaged in the collection, treatment and distribution of drinking water for homes, businesses and fire protection service. The Maine Water Company serves approximately 85,000 people in 21 communities across Maine. For more information, visit [www.MaineWater.com](http://www.MaineWater.com).
